

Dear Sirs/Ma'ams: Any attempt to limit the reach and scope of satalite radio, specifically XM, is wrong and uncomprehendable. I live well outside any large city market. AM is practically non-existant, FM stations offer little variety. I find XM the best in quality radio entertainment, news, and weather. I also occasionally listen to traffic some of the big cities to affirm my decision to live in small town america.

Please tell the NAB to get over it and provide better service!
